Summary

Dedicated software/networking engineering student with a passion for programming and critical thinking. With a year of programming experience, I've gained valuable team collaboration and development skills. Proficient in Java, HTML, CSS, JS, & Python. Seeking a software development position as an intern.

Education

Sheridan College

Jan 2023 - Jan 2026

Software Development & Network Engineering (Advanced Diploma)

Oakville, ON

- Achieved 85% in Java - Object Oriented Programming
- **Clubs:** Google Student Developer Club
- **Relevant Coursework:** Java Object Oriented Programming, Web Development, Operating Systems, Software Design Fundamentals, Cloud Enabled Networks

Skills

Languages: Java, Python, Javascript, HTML/CSS, PHP

Frameworks: Spring, Bootstrap, React

Developer Tools: Git, VS Code, PyCharm, IntelliJ, Figma, Visual Paradigm

Projects

FilmFanatic | Java, JavaFX & FXML

- Collaborated on a movie management app designed to help users organize/track their watched movies and movies they plan to watch
- Used **MVC Architecture** to follow architectural pattern and promote separation of concerns/code organization
- Implemented **Authentication/Security** by creating a login page with secure password handling and ensures user data privacy and protection
- Incorporated **exception handling** to allow user to explore application without any errors
- With **Database Integration**, can store movie data securely and allow users to add, remove and manage their movies
- Adhered to **SRP** and **DRY** principles for clean and maintainable code

CarRental | HTML, CSS & JS

- Responsive web application designed for users looking to rent cars. Incorporated modern web design principles & technologies to provide an engaging and user-friendly experience
- **Responsive** and optimal viewing on **various devices**
- Incorporated **mobile friendly** navigation menu and easy to use nav menu overall for desktop too
- Implemented **car rental form** for users to input location, pickup date, and return date for rental
- Utilized **ScrollReveal library** to create smooth scroll animations to enhance user engagement

Personal Portfolio | HTML, CSS & JS

- Used **HTML** to structure content of website, defining sections, headings, etc
- Employed **CSS** to style font, colors, spacing, layout, and responsive design rules, ensuring **user-friendly interface**
- Utilized **Javascript** for **interactivity** and **functionality**. Included a **function** to toggle mobile navigation open/closed, enhancing **UX** on smaller screens
- Used **media queries** to enable responsive design

Work Experience

Visions Electronics, Vaughan - Sales Associate/Account Manager

June 2022 - December 2022

- Employed as salesman /account manager of car audio department
- Worked well in team environment, dedicating excellent customer service
- Effectively managed and grew customer relations while managing multiple projects
- Using communication/negotiation skills, understood unique needs/goals of each account
- Met deadlines & exceeded expectations

Barista Supervisor, Halifax

August 2020 - February 2022

- Supervised and trained team of baristas, ensuring they have the proper skills to be on the floor serving customers
- Managed inventory/supplies, placing orders if needed
- Maintained a clean and organized workspace
- Prepared/served range of food and beverage items (coffee, tea, pastries, etc.)
- Provided exceptional customer service by greeting customers, taking orders, and answering questions
